

NO-LIE-NO-REWRITE-1.0 ? receipts hash; no rewrite key

Author: Aziel Eliab only.

Status: LIVE law (2026-09-14). Not a Softwares-tab product. Not a FragGate slug. Not a Remain-OFF flip.

Companion under the umbrella: [CROSS-NETWORK-SURVIVAL-1.0](CROSS-NETWORK-SURVIVAL-1.0.md) (does not replace the machine tip). Mesh rollup: [NODE_MESH](../NODE_MESH.md). Executable: 'src/no-lie.js'.

Aziel Eliab • law • independently verifiable • no rewrite key

NO-LIE-NO-REWRITE-1.0

The network is never allowed to lie ? even to stay alive

Identity: Aziel Eliab only

Surfaces: designs + mesh + NODE_MESH + CROSS-NETWORK-SURVIVAL-1.0

Close tests: scripts/verify-no-lie.mjs

0. Sentence

Receipts that still hash. Copies not all on one tunnel. Rules simple enough others verify without your voice. No rewrite key.

1. Claim

A mesh that can rewrite its own tips, or invent a yes to self-preserve, is already dead as a witness. Survival is copies plus hash, not a story the node tells itself.

This paper is the constitutional ****NO-LIE / NO-REWRITE**** lock. It does not add a Softwares card, an MCP tool, or a public enable switch.

2. Four rules (others verify without the author)

Rule	How a stranger checks
Receipts still hash	Recompute SHA-256 of the canonical unsigned body. A mutated field fails. The author's voice is not a step.
Copies not all on one tunnel	A legal copy-set has at least two named planes (example: local vault + public cite, or tunnel-front + worker-standby). One tunnel alone is refused.
Rules stay simple	The five sentences in §0 and this table are the whole law. No secret clause. No operator commentary required to fail a break.
No rewrite key	There is no token, bearer, or admin path that makes a broken hash pass. Refuse 'MESH-NO-REWRITE'. History appends. It does not overwrite.

3. Never lie to survive

The network is ****never allowed to lie**** ? even to self-preserve, sustain,

Those motives are not exceptions. They are the names of the temptation.
A dying hostname, a pulled tunnel, a dark corpus, or an isolating peer
does not authorize:

- a rewritten tip
- a false receipt
- a painted live count
- a merge of two tips from one node
- a claim that one tunnel still holds every copy

Refuse 'MESH-NO-LIE'. Survival that needs a lie is not survival.

4. What it is not

- Not a Softwares-tab product. Do not add slug 'no-lie' or 'no-rewrite'.
- Not a FragGate engine. No 'fraggate_call { slug: "no-lie" }'.
- Not a new MCP tool. 'PUBLIC_MCP_TOOLS' stays frozen.
- Not a Remain-OFF flip. Do not enable remain-off items.
- Not a rewrite of QNM-BUILD-1.0. Suite-presence ON and disable-refused stay.
- Not a VPN, mixnet, or origin-hiding kit.
- Not permission to resurrect a pulled public hostname.

5. Surfaces

- Designs: this paper + cites on QNM-WP, NODE-OPS, TUN-WP, ACT-RECEIPT, LOCKSET.
- Mesh: 'GET /v1/mesh' carries 'no_lie', 'no_rewrite', 'rewrite_key: false', 'lie_to_survive: false', 'copies_one_tunnel: false'. Rewrite / lie verbs refuse.
- NODE_MESH: live QNM-BUILD-1.0 rollup law. This paper does not replace it.
- CROSS-NETWORK-SURVIVAL: how copies and hash outlive one tunnel.

6. Close tests

- A receipt whose body changed fails its hash.
- Passing a rewrite key still fails.
- One tunnel as the only copy plane refuses.
- Two independent planes pass.
- Motives self-preserve / sustain / stay-alive / adapt / prevent-death cannot authorize a false claim.
- The five rules match 'NO_LIE_RULES' in 'src/no-lie.js' without commentary.
- Mesh ops 'rewrite', 'lie', 'lie-to-survive' refuse.
- No Softwares card. No new MCP tool.

7. Identity

Author / identity: Aziel Eliab only. Apache-2.0.

Eliab, Aziel. (2026). NO-LIE-NO-REWRITE-1.0 [Design].
