

Architecture — azieleliab.com software set

AZL-ARCH-1.0 · runtime 1.6.13 snapshot · 2026-09-06 · Aziel Eliab · not a new slug

Near 40 because the landing names the tab plus the door plus the kernels plus the local fabric. The tab itself is 34 (33 live + EmbryoLock stub).

1. Count

Set	N	Members
Software-tab	34	plain → gate → lock. 33 live + EmbryoLock stub
Door extras	2	FragGate kernel, QNM/mesh kernel
Runtime host	1	aziel-runtime (on the landing; not a tab engine)
Local fabric	1	qnm-node — full node process
Loopback sibling	1	anon-broadcast — qnm-node module only
Named set	39	azieleliab.com · corpus · godlock.uk list these

2. Planes

FACES (azieleliab.com | corpus | godlock.uk) → DOOR (aziel-runtime) → KERNEL (FragGate + DecisionGATE) → BOOK / OVERLAY / FABRIC / HARNESS. Beside those: SURVIVAL (azieltether), ASSIGN (miragegrid), SIDE-NET (aznet, azbrowser, azmail), RECEIPT (temporallock, forgereceipts, peacelock), VAULT (ark, embryolock), CLOCKS (staticclock, chronolock), LOCK ENGINES, OTHER (glossa, postking, zsolver, azclce, azai).

Every live exec from a face, harness, or MCP still hits FragGate. /p/{slug}/{op} is proxy, not exec. Faces never seat a 25-node cell. GET /v1/mesh never enables. Clock is not Lock. Vaults never unlock on a Worker.

3. Wiring

human UI or MCP → DecisionGATE → POST /v1/fraggate/call {slug, op, payload} → live engine or named refuse → AZL-LEDGER / TemporalLock record → disposable render. Local fabric acts skip Worker enable and still write a ledger record.

4. Plain + book + overlay + harness

Slug	Job in the architecture	Must not
aziel-corpus	Book. MASTER shelf. Content-addressed.	Chatbot memory; public private-file search
azos	Ethics overlay. Integrity before exec.	Remote shell; exec stub
azai	Local OpenAI-compatible runtime.	New model; paid-key proxy; Jeeves sovereign
azbot	Harness / skill. Local 1.1 profiles.	Weights; browser login; silent post
azbrowser	Cite-search browse. Pair with aznet.	Invented visits; harvest
azhub	Blank Key container. Places modules.	Interpret modules
azieltether	Survival of downloads. Prefer-central.	VPN; mesh-on public pages
azinterface	Page cycles including MEMORIAL.	Exec catalog engines
azmail	Airlock classify. Optional ring.	MTA; smtp; login; harvest
aznet	Silent verify. Memorial hashes.	Host payloads
azclce	Inconsistency R/D/P.	Intent detector
forgereceipts	Local checklist / receipt helper.	Court contact; legal advice
glossafilter	Same intent across peer renders.	Authorship stamp
miragegrid	Ephemeral mesh-id assign.	VPN / hop / tunnel
postking	Continuity game: remain.	A mesh protocol
staticclock	Five advisory geo fields.	Scheduler; a Lock

Slug	Job in the architecture	Must not
ark	Local vault heuristics. Envelope hash.	Hosted unlock / store
zsolver	Nine ontology nodes. Cap 75%.	Solve cases; blend missing score

5. Gate, kernels, host, fabric

Slug	Job in the architecture	Must not
decisiongate	Pre-exec five gates.	Skip for convenience
fraggate	Hashed registry. Refuse ledger.	Become engine #35
mesh	Public rollup counts.	GET-enable; fake 25 peers
aziel-runtime	Host for door + catalog.	Claim proxy is exec
qnm-node	Local process. Cell 25 / 2 bridges.	Public bind; auto-heal spent ID
anon-broadcast	Local TTS/desk MP4 + hash.	Upload proxy; origin hide

6. Locks

Slug	Job in the architecture	Must not
chronolock	Advisory 08:30–10:30 local window.	Be TemporalLock
codelock	Perceptual view of source.	Change meaning
embryolock	Local scorched vault. Tab stub.	Hosted Worker; FragGate engine
employeelock	Hash-chained workbook.	Court; UL kit; truth score
foldlock	Tether-word suppression on UTF-8.	Zip; file crypto
godlock	ABAD score + public stress node.	VPN / anonymity net
mialock	Event map + Doe leads + heat.	ID claim; live tracking
peacelock	Chosen silence as a receipt.	Invent a transcript
shadowlock	Zero-retention observe of your list.	OS hook
spectrallock	256px overlay preview.	Lab spectrometer
temporallock	Receipt primitive genesis/append/verify.	Chain model sentences
trajectorylock	Geometric test prototype.	Certified forensic instrument
veillock	Local camera/screen on this device.	Call intercept
vibelock	Speech physical-consistency risk.	Liveness proof
whistlelock	Local drop + dead-man copy.	Mailer; send/release

7. Close tests

- 34 tab + 2 extras + runtime + qnm-node + anon-broadcast = 39 named.
- No Lock must call another Lock to boot.
- Every live exec names FragGate or local loopback.
- Clock ≠ Lock. EmbryoLock stays local-not-hosted. MirageGrid hop stays stub.
- Public GET /v1/mesh does not enable.

azieleliab.com is the literary landing + software strip + /runtime proxy. Identity Azriel Eliab only. Snapshot 2026-09-06.

If the files hold, the name was never the point.
